

Competition on Sustainable Agriculture

a complex competition involving science, engineering and economics

Who are we?

We are the nonprofit organization BEST, that works to enhance university students' abilities and expose them to an international environment. Our organization is the local group of the Board of European Students of Technology (BEST). We have been holding major European engineering competitions (EBEC) for the past 15 years, and each year we reach thousands of gifted students, from a wide range of engineering and IT backgrounds.

What is CompSA about?

- Encouraging students to think about complex tasks related to sustainable agriculture
- Connecting students with different backgrounds
- Creating an atmosphere where new innovative ideas can be born

Competition details

- 2-day competition in October for teams of 4 from diverse academic backgrounds
- Place for 25 teams (100 participants), lunch and coffee break provided
- Day 1: rough exploration and brainstorming on a given topic
- At the end of Day 1 experts review the ideas and select the most promising ones
- Day 2: elaboration of the best ideas, live presentation in the end

Our offer for collaboration

- Opportunity for a company presentation during the event
- Display in the social media materials, university posters and media appearance
- Partners gain access to the resulting materials (presentations, documentation of ideas)
